DETAILED ACTION

Allowable Subject Matter

1. Claims 17-18 are allowed.
2. The following is an examiner's statement of reasons for allowance:

As for claims 17 and 18, Proehl (6532589) discloses receiving electronic program guide information, creating a calendar including a plurality of dates and displaying the created calendar on a display device, means for determining whether a date from said calendar has been selected or an input of user schedule information has been made, creating a selected date display and displaying the created selected date display on the display device, and determining whether a request for the EPG information has been made while the selected date display is being displayed on the display device. Creating an EPG display for the selected date and displaying the created EPG display on the display device, responsive to a determination from the second determining means that the request for the EPG information has been made while the selected date display is being displayed on the display device. Determining whether a request for a viewing or recording reservation of a desired electronic broadcast program or programs has been made while the EPG display is being displayed on the display device. Means, responsive to a determination from the first determining means that the date has been selected, for accepting an input of user schedule information in which a user is able to edit a personal event or events of the selected day, and responsive to determinations from the first and second determining means, respectively, that the date has been selected and that the request for the EPG information has been made while the

selected date display is being displayed, causing said EPG information which comprises at least program guide information of the selected date to be displayed on the EPG display, and responsive to the determination from the third determining means that the request for the viewing or program reservation of the desired program or programs has been made while the EPG display for the selected date is being displayed on the display screen, for accepting a viewing or recording reservation schedule for a desired program or programs, and means for controlling display of the schedule information of the user's personal event or events and schedule information of the electronic broadcast program or programs to be viewed or recorded on said calendar.

Barnett (6369840) discloses the personal event or events comprising events unrelated to the request for the EPG information.

Howe (6826775) discloses performing timeout if no action has been made within a predetermined period of time.

Nishikawa (6481010) discloses a television which displays a monthly calendar that indicates which programs are purchased and/or selected for recording.

The prior art of record fails to disclose means for determining when a date has been selected, whether a request for the EPG information has been made for the selected date, for determining when the request for the EPG information has not been made, whether an input of user schedule information has been made for the selected date within a predetermined period of time, and for performing timeout if not request for the EPG information and no input of user schedule information has been made for the selected date during the predetermined period of time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
